Supa-Trac™ panels provide a quick and easy flooring solution which require no tools to install on-site. With up to 500m² per hour installation and extraction rate – it's the simplest, fastest and most efficient ground cover solution of its type on the market. Coming in pre-connected sheets of 15 pieces Supa-Trac™ can easily be broken down and customised, ensuring it works around any problematic objects on your site.

Additionally, the flooring panels are easy to remove by hand and can be stacked and stored easily. Supa-Trac™ creates a firm surface for walkways, roadways, temporary buildings and structures - even helipads & car parks!

EVENT SERVICES

Resistant to UV damage

Traction: Anti slip surface

Self draining inert and non-conductive

Deployment of 40m² per hour per man

Resistant to solvents and non-corroding
