

The JETMISTER is a revolutionary dust suppression bowser that will solve most construction and demolition site dust issues. 2000 Ltr (440 G) Water bowser that can easily be positioned to tackle the dust. 10 to 30 metre throw powered by either a diesel engine or an electric pressure pump with a 45° or 90° auto oscillating jet nozzle on a tilting mast.

JM35 PROFORMANCE

JMRT35-2000-RC	
Mist Distance M (Ft) (no wind)	25-30 M (80-100 Ft)
Surface coverage M ² (ft ²)	500 M ² (5300 ft ²)
Water Consumption Lpm (gpm)	25-40 Lpm (110 - 178 gpm)
Applications Indoor	Wood chip wetting and stone ballast dust suppression
Applications Outdoor	Demolition, stone ballast dust suppression
Average Water Droplet Size μ	180 micron

JMRT35 SPECIFICATION

	JMRT35-D	
Engine / Voltage / Frequency	Diesel Yamar	
Current Consumption		
Power Connection	N/A	
Pump Motor Kw	10	
Dimensions mm (inch)	3500L x 1560W x 2150H (122"x 61"x 84")	
Weight Kg (Lbs)	Empty 400 KG (880 Lbs)	
Number of Nozzles	1	
Vertical Tilt Angle	0° - +45°	
Oscillation	45° - 90°	
Water Supply Connection	3/4" Claw Coupling	
Required Water Pressure / min flow	2-5 bar / 40 Lpm	
Water quality	Potable / Filtered	
Operating Temperature	+2°C - 50°C	

STANDARD EQUIPMENT

- Road tow legal water bowser 2000 ltr capacity
- Electric start with remote control
- Dry run protection
- 6 metre supply lead and plug (JMRT35-E)
- Quick release coupler with 10 M pressure wash hose and lance.
- 0°, 45° and 90° auto oscillation
- Inlet filter
- Electric start (JMRT35-D)
